

# Teaching and Learning Workshops

Overview: The workshops are developed to support teaching and learning for anyone instructing UCT health sciences students, regardless of their experience level. Each workshop is planned for two hours, allowing participants to engage in a synchronous one-hour session conducted via MS Teams and to complete asynchronous online activities in VULA, which may take an additional hour.

| Workshop                                                                                                                                                                   | Date          | MS Teams synchronous session             |
