Building Inclusive Communities of Care Together

## SEMINAR SERIES

### “The Site Facilitator, a key role player in the UCT Health Sciences Faculty for social responsibility”

The seminar aims to portray the evolving role of the site facilitator since its inception in 1996. At the time, the role was that of a community liaison. Currently, site facilitators have a three-fold responsibility to communities, students and the University. This includes a greater social responsibility footprint in all five communities which they serve. The presentation will elaborate on the benefits, barriers and challenges of the site facilitator as a social responsibility agent within the community context.
