

Online Essentials Of Nursing Children with a Cancer / Blood Disorder Course

Learning outcomes

At the end of the course, participants will be able to:

1. Articulate their role, within the complex system and environments in which children are nursed to ensure safe and efficient care for best possible outcomes.
2. Describe cancers and blood disorders common in the region, and the associated diagnostic and treatment modalities.
3. More confidently provide safe, quality, evidence-based nursing care to a child with a cancer or blood disorder, using the Regul8 Framework as a guide.
4. Discuss the communication needs and palliative care required by a child and their family during the journey with a cancer / blood disorder.

Course content
