

## Online Essentials Of Paediatric Burns Care Course

### Learning outcomes

At the end of the course, participants will be able to:

1. Explain normal anatomy and physiology of the skin and how this is impacted when a burn injury is incurred.
2. Describe the role of health professionals in the system of care required for children who have sustained a burn injury.
3. More confidently provide safe, quality, evidence-based nursing care to children with a burn injury, in the acute phase, using the Regul8 Framework as a guide.
4. Discuss the longer-term management and maintenance of the skin and wellbeing of a child who has sustained a burn injury.

### Course content

#### Weeks 1-11

Week 1	Context, Anatomy and Physiology and First Aid
