

## A Landmark Achievement in Occupational Health & Safety Training

In an innovative stride towards excellence, **International SOS** proudly announces the enrollment of nearly **340 elite healthcare professionals** from Africa in a bespoke **Occupational Health & Safety (OHS) training programme**. This prestigious, academically accredited initiative has been meticulously developed by the **Occupational Medicine Division** at the renowned **University of Cape Town (UCT)**, South Africa, in collaboration with International SOS.

This groundbreaking project has come to life under the visionary leadership of **Dr Olivier Lo**, Group Medical Director, Occupational Health Services, and in close partnership with **Dr Fanie Jute**, Regional Medical Director Africa, and **Dr Dave Knight**, Senior Health Consultant. Their collaboration with **Prof. Mohamed Jeebhay**, Head of Occupational Medicine at UCT, and **Dr Itu Ntatamala**, Occupational Medicine specialist at UCT, has set a new benchmark for OHS short courses when it comes to **multidisciplinary training** for primary-level occupational health practitioners on the African continent.

The programme, comprising **12 interactive and self-paced modules**, is accessible through International SOS' state-of-the-art e-learning platform. It offers unparalleled flexibility for trainees to tailor their learning journey to their unique personal and professional schedules. This cohort includes distinguished doctors, nurses, and paramedics, whether stationed on remote sites or based in offices, all dedicated to delivering **top-tier healthcare services across diverse industries such as oil and gas, and mining**.

Participants who successfully complete this transformative programme will earn **Continuous Professional Development points** and receive a prestigious **co-branded certificate** from the University of Cape Town and International SOS. This certification not only signifies their competency but also lays a robust foundation for further academic pursuits in OHS.

Join us in celebrating this unique milestone that promises to elevate the standards of occupational healthcare and safety, benefiting both our dedicated professionals and the esteemed clients of International SOS.
