

# YOUR RIGHTS

I am afraid of being harmed by poison.  
It helps me to know I have rights to  
protect my safety.

- Proper training about working with pesticide.

- Knowing about the pesticides you work with and how to notice symptoms of poisoning.

- Workers should be able to insist their co-workers work safely.

- Adequate sources of water for washing in case of a spill.

- Separate lockers for dirty and clean overalls.

- Correct personal protective equipment.

- Being warned if pesticide is being sprayed near my home or where I am working.

- Regular health check-ups when working with very dangerous pesticides.

- A facility to wash overalls at the workplace, so that poison soaked overalls are not taken home.
